

HydroFLOW®

Vitality Filter

Granular Activated Carbon

Improves smell and taste and helps remove - Chlorine, VOC's, Lead, Mercury, Organic Chemicals, Trihalomethanes, Pesticides, and Herbicides.

.01 Micron UF Membrane

Ultra-filtration membrane that can help remove virus particles, protozoans and bacteria.

Kinetic Degradation Fluxion (KDF 55)

This NSF approved method of water filtration makes our personal filter different than others on the market. KDF helps remove Heavy Metals, Arsenic, Nickel, Chlorine, Iron, Hydrogen Sulfide, Lead, Mercury, Manganese, Chromium and inhibits bacteria growth.

Sediment Filter

The detachable sediment filter is recommended to be used when the water source has a significant amount of suspended solids. Sediment filters will remove Sand, Silt, Clay, Organic Material, Suspended Iron, Suspended Manganese, and Visible TSS.
