

Hydropath Marine HM Units

Dear Amir

I would like to thank you for introducing me to The Hydropath Marine products.

I have fitted these to my vessels and am pleased to see they live up to your claims that the Fresh Water Generator would be free from scale build up and loss of production, this is further enhanced as the need for chemical dosing is no longer required.

The units are simple to fit and maintenance free. The added bonus of killing bacteria only enhances the product. I will fit these on all our new buildings.

I plan to fit smaller units to the vessels fresh water domestic systems which will maintain a scale free system and augment the water steriliser unit.

I would recommend your products be installed on all vessels

Yours Sincerely

Simon Zdrojewski
